

Daily Meditation 05-12-22

The Religion of Fascism

Good morning.

In today's meditation, we talk about the religion of fascism...the religion of fascism... because fascism has its own religion, and really is its own religion. As I point out in the opening sentence of our meditation, fascists do not worship the God of love, or a God of beauty, or a God of justice, or a God of compassion, or a God of creativity, or a God of truth.

What are they worshipping?

They worship a God and Gods of power. That which will make them strong, so that they can power over others, so they can keep others down. Especially women, it's always women, women are always part of the fascist obsession. And especially when it comes to sex, and having babies, or not having babies, they get absolutely triggered, and obsessed.

And you can read that in this draft decision by Judge Alito. As women have pointed out, there's not an ounce of empathy, or respect, or even consideration for women's needs in that horrible document. What there is, is quoting from this misogynist of the 17th century in England, who literally burned witches at the stake and denounced women saying they have no rights. Especially in marriage, they had no rights. They were property of their husbands.

Now, of course, to any sane person, we'd say "Well, that was four centuries ago; surely we've made progress. But no, that's what originalism is about, the so-called philosophy, the so-called legal theory that they weren't even teaching in law schools 30 years ago, but that now dominates the Supreme Court, which has been picked, handpicked by an Opus Dei member.

That's important because most Opus Dei members are in the closet, and it's kept secret who they are. But this particular one, Mr. Lee, who works for the foundation that fed continually candidates to Republican leaders for the Supreme Court. He, Opus Dei, picked five of the six conservative members of the Supreme Court currently.

And they do not worship the God of justice or truth. And this is why they're ramming through this killing of Roe versus Wade, even though 70% of Americans want to keep Roe vs. Wade, and for 49 years, all kinds of Supreme Court judges, those appointed by Republicans as well as those appointed by Democrats, have backed Roe versus Wade.

So again, I think, to counterbalance this ugly religion called fascism, called organized violence and institutionalized violence, I'll share with you a few more of the names for God. That would be a counterbalance to the viciousness of the gods of fascism.

God is goodness.

God is the One to whom we give our thanks.

God is the mind of the universe.

God is joy.

God is greening power.

God is life.

God is music.

God is mother.

God is the Black Madonna.

God is Shekhina.

God is Gaia, Mother Earth.

God is the transcendent care of all creatures.

God is Kuan Yin.

God is the web of life.

God is the ineffable one, the one without a name, who'll never be given a name.

God is silence.

Thank you. We'll see you tomorrow.
